Production Access Credentials & Roles Directory

Official account credentials across all 5 operational clearance tiers for staging, testing, and production deployment on Vercel.

CRITICAL NOTICE FOR VERCEL PRODUCTION DEPLOYMENTS:

When launching on Vercel, fresh visitor browsers have empty localStorage. The application features an automatic production bootstrap layer that pre-provisions all seed accounts below immediately upon page load. If testing on a new domain, use any account below.

For cloud multi-device sync, ensure your Vercel domain (*.vercel.app) is authorized in Firebase Authentication settings.

1. Master Accounts & Login Clearance Matrix

ROLE / TIER	USERNAME	PASSWORD	ORGANIZATION / BRANCH	PERMISSIONS & SCOPE
Level 1: Site Owner (Platform Super Admin)	`admin`	`admin`	Global Platform (All Clients & Campuses)	Full Control: Site Admin Hub, Module Governance, Cloud Sync, Edit/Delete Any Campus
Level 2: Client Admin (Aplus School System)	`client.admin`	`campus`	Aplus School System (Tenant Client Hub)	Tenant Management Hub: Sub-Campus Management, Branch Accounts, Consolidated P&L
Level 2: Client Admin (Apex Grammar Academy)	`apex.admin`	`campus`	Apex Grammar Academy (Isolated Workspace)	Tenant Management Hub: Apex Branch Overview, Sub-Campus Registration, Client Reports
Level 3/4: Branch Accountant (Khiali Main Campus)	`main`	`campus`	Khiali Campus (Main Branch - Aplus)	Operational Ledger: Cash & Bank Vouchers (BPV, BRV, CPV, CRV, JV), Petty Cash Imprest
Level 3/4: Branch Accountant (People's Colony Branch)	`peoples`	`campus`	People's Colony Campus (Satellite Sub-Campus)	Branch Cashbook: Daily Petty Cash Disbursements, Voucher Queue, Physical Cash Audit
Level 3/4: Branch Accountant (DC Colony Branch)	`dc`	`campus`	DC Colony Campus (Satellite Sub-Campus)	Branch Operations: Cash Reconciliation, Voucher Submissions, Local Branch Ledger
Level 3/4: Branch Accountant (Model Town Branch)	`model`	`campus`	Model Town Campus (Satellite Sub-Campus)	Branch Accounting: Petty Cash Float Replenishment, Daily Voucher Posting, Reports
Level 3/4: Branch Accountant (Cantt Branch)	`cantt`	`campus`	Cantt Campus (Satellite Sub-Campus)	Branch Accounting: Double-entry Bookkeeping, Vouchers, Local Balance Sheet
Level 3/4: Branch Accountant (City Campus Branch)	`city`	`campus`	City Campus (Satellite Sub-Campus)	Branch Operations: Daily Cashbook, Local Bank Reconciliations, Expense Logs
Level 5: Senior Auditor (Internal Compliance)	`auditor`	`campus`	Global System (Independent Review)	Read-Only Audit: Multi-Campus Ledger Review, 7-Day Physical Cash Vault Logs, Audit Trail

2. Step-by-Step Vercel Deployment & Production Setup

Follow these standard deployment instructions to guarantee immediate login and uninterrupted database sync on Vercel.

STEP 01 **Deploy Directly from GitHub Repository**

Push your codebase to GitHub and import the repository into your Vercel Dashboard. The build preset automatically uses "vite build" with output directory "dist". No build command overrides are required.

STEP 02 **First-Time Sign In with Master Site Owner Account**

Open your generated Vercel production URL (e.g., https://your-app.vercel.app). At the unified login gateway, enter username: "admin" and password: "admin". You will be immediately granted Level 1 Site Owner access.

STEP 03 **Authorize Vercel Domain in Firebase Console**

Open the Firebase Console for your project (gen-lang-client-0191400825). Navigate to Authentication > Settings > Authorized Domains. Click "Add Domain" and add your Vercel domain (e.g., your-project.vercel.app). This unlocks cloud sync.

STEP 04 **Initialize & Push Initial Cloud Snapshot**

From the Platform Site Admin Hub, go to Section 10 (Cloud Sync & Backup) and click "Sync to Cloud". This establishes the master snapshot in Firestore so changes made by any user propagate across all devices in real-time.

STEP 05 **Distribute Branch & Auditor Credentials**

Provide your campus accountants with their branch username (e.g., "main", "peoples", "cantt") and default password "campus". Branch accountants can only view their authorized campus ledgers and petty cash books.

3. Executive Dashboard & Role Governance Constitution

- Executive Dashboard Isolation: The Executive Dashboard is reserved strictly for high-level financial KPIs, revenue vs expense telemetry, petty cash breakdown charts, and campus budget comparisons.
- Site Owner Exclusivity: Permission Engine, AI Expense Suggester, Approval Matrix, Cloud Sync/Load, Bulk Approvals, Restore Deleted COA, Audit Trail, and System Settings are strictly reserved for Level 1 Site Owner ("admin").
- Multi-Tenant Isolation: Level 2 Client Super Admins can only see and manage branches belonging to their own organization. All child transactions and cash records are completely isolated.
- Branch Accountant Least Privilege: Campus accountants (Levels 3 & 4) only operate daily voucher entry, petty cash logs, and vault reconciliation within their designated campus boundary.
